## "German Syrup"

J. C. Davis, Rector of St. James' Episcopal Church, Eufaula, Ala.: "My son has been badly afflicted with a fearful and threatening cough for several months, and after trying several prescriptions from physicians which failed to relieve him, he has been perfectly restored by the use of two bottles of Dr. An Episcopalschee's German Syrup. I can recommend it without hesitation." Chronic severe, deep-seated coughs like this are as severe tests as a remedy can be subjected to. It is for these long-standing cases that Bosch's German Syrup is made a specialty. Many others afflicted as this lad was, will do well to make a note of this.

J. F. Arnold, Montevideo, Minn., writes: "I always use German Syrup for a cold on the lungs. I have never found an equal to it—far less a superior." G. G. GREEN, Sole Man'fr, Woodbury, N.J.

### BOSTON'S GIRL SCULPTOR.

First of Her Sex to Receive Honorable Mention from the Paris Salon.

Among New England's fair daughters who woo the goddess art, no one is bidding closer to fame than Miss Theo Alice Ruggles, Boston's girl sculptor.

Whatever may be the decision of the judges in the competition at Providence for the statue of Shakespeare which that city is going to erect, Boston is proud to have submitted one of the best models, and that at the hands of a woman, and a very young woman besides. Miss Ruggles has chosen for her Providence model to represent the bard of Avon as he might have been seen in his library had one chanced there upon an afternoon 200 years ago, and been a visitor interesting enough to engage his host's attention. Shakespeare, without hat or mantle, clad in doublet and hose, is seated upon a cross-legged stool in a natural, easy pose, that is, without alert with vitality. The right hand, resting upon his right knee, holds a roll of manuscript. The left hand is upon his hip, the left foot and leg being drawn back in an unstudied position.

The daughter of Mr. C. W. Ruggles, one of Boston's well known business men, Miss Theo's home is with her family in artistic apartments at 165 Falkmouth street, on the Back bay, her studio being, as it has been from the first, with her teacher, Mr. H. H. Kitson, the prominent Boston sculptor, whose "Christ" is one of the latest and one of the best examples of his art.

In clay by summer and in snow by winter Miss Ruggles' childish bent for modeling unfolded itself till the small maiden's unmistakable talent won the attention of her parents. It is six years since those who were in the open secret trooped out to Brookline to see and remained to admire the wonderful snow statue of the reclining horse made by the little girl of fourteen years. It was but a bit of play work in the yard of what was then the family residence, but it served to emphasize the childish admiration for form and beauty and led to Theo's introduction to Mr. Kitson.

Four years ago she went to Europe, accompanied by her mother, settling down in Paris for work and study. In the spring of 1888, after a few months on the other side, Miss Ruggles, then but seventeen years old, sent two pieces of sculpture to the Paris salon, and both were accepted. One, "The Shepherd Lad," was especially complimented by the critics, who referred to it as the work of Mr. Theo Ruggles, a mistake that was afterward corrected with a reiteration of the compliment earned by the work.

To the salon of 1889 Miss Ruggles sent her beautiful work, "On the Banks of the Oise," representing a nude boy gazing seemingly into a stream. This received "honorable mention," the first ever conferred by the salon upon a woman sculptor.

Other honors have fallen upon the young sculptress, who is now barely twenty years old and working away as industriously still and as unpretentiously as if her first laurels were yet unwon. A beautiful girl, dark complexioned, graceful by nature and untrammelled by inartistic "smear" frocks or coats, fond of all out doors, devoted to her family and her beautiful greyhound, Glaucus, quiet at her work, which she does swiftly, talking little about it, loving it—it is but a faint sketch these outlines make of the young sculptor.

"Unspoiled" is what her friends say of her. It must be so else the glamour of success already so pronounced as hers would not discover her now the gracious, sweet, strong, womanly personality it found her. —Boston Globe

# RAINMAKING SEEMS A SUCCESS.

A dispatch from Cheyenne, Wyoming, dated September 1 says: A fair and successful, if not entirely conclusive test of the Frank Melbourne method of producing rain, was had here this afternoon, and the demonstration has created a profound sensation. The people are filled with amazement. The most violent skeptics capitulate, while Melbourne is self-sustained, placid and confident as ever.

At 8 o'clock last night a careful competition was made of the records of the local signal office and telegraphic reports from other bureaus. At that hour the Cheyenne Signal Service observer said a rainstorm was approaching from the northwest. This morning it was learned that the Montana and Dakota visitation had been carried east to spend itself in Wisconsin, while every local condition presented fair and dry weather. There might be a mist, the prophet of the Agricultural Department ventured, but there could be no considerable precipitation.

In the mean time Melbourne was at work. He was engaged in active labor, and behaved to the interviewer as usual, looking wise, and only saying that he would make the rain come. At 2 o'clock this afternoon only light, fleecy clouds skirted the horizon.

In half an hour black, heavy clouds began to collect near the laboratory, the rest of the sky being clear. At 2:45 a shower started, and in twenty minutes, when the rain subsided, there had been a fall of eleven-hundredths of an inch. This was generally regarded as accidental. Melbourne claimed it was not, and said there would be more.

Capt. Ravenscroft, the observer, had been studying his instruments and admitted, unwillingly, that he was completely mystified, and said the shower was certainly in part due to artificial causes. He predicted, and every appearance indicated, that the remainder of the day would be clear.

At 4:30 the severest shower of the season sent every one in doors. There was a driving downpour for half an hour. It was preceded by sharp lightning and thunder, the latter being a clear but uneven report. This fall made the total .47 of an inch, nearly the half inch promised by the wizard.

The wind was against Melbourne until the rain started. Cheyenne was a storm center for an area extending twenty-five miles in every direction. During the experiment the wind veered clear around, almost describing a circle.

Melbourne says there will be much more rain. He has a hole in the roof of his shop, but nothing has been seen to come from the opening.

Captain Ravenscroft and the gentlemen who brought Melbourne here are well satisfied, and if to-day's experiment is to be a criterion, the man must be granted mastery of the elements. Further trials will follow, and in case of success arrangements will be made for State service by the owners of large tracts of land.

If this is true, and rain can be produced by human power at will, no one can calculate, and it is hard to imagine, the benefit that would be derived from it in the State of Nevada. Why not invite Mr. Melbourne to visit Nevada to test his apparatus here?

## VIBRATORY TELEGRAPHING.

A new method of telegraphing has been tried at Chicago. One of the operators sat at an ordinary receiver placed in an office on the first floor of a building. He used the Morse alphabet and tapped the message along a rubber tube to his companion on the third floor. The vibration of the air in the tube caused a mica disc in the receiver upstairs to flutter tremulously, and this being connected by an electric wire caused the hammer to tap the message clearly and loudly on the receiver.

This was the only place in which electricity was used, and one cell was found sufficient to work the machinery necessary to receive the message that the vibrating air sent along the tube. It is by vibration that the inventors propose to revolutionize the present system of telegraphy. They claim that with their system the present expensive method of insulation with the electric telegraph will be entirely done away with, and that the risk of snapping or breaking by overcharges of electricity will be reduced to a minimum.

The men who invented this system are William E. Sloane, John E. Hughes and Orrin S. Reed. Sloane and Hughes are gasfitters. Thus far messages have been sent through tubes only 1,200 feet long, but experiments will soon be made between cities remote from each other, and then it will be known whether vibratory messages can be sent as clearly and quickly, and at the same time as far, as messages by electricity.

## BY TELEGRAPH!

### News of Importance From Home and Abroad.

#### The Dallas Fire.

Special to the Journal.

THE DALLAS, Tex., September 3.—About one-third of the residence and business part of The Dallas is in ashes, and perhaps not less than one thousand people are left homeless.

The fire started about 1 o'clock in a one story dwelling house. Before the engine began to work the fire had spread to the houses on each side. For hours after the fire started the wind blew a gale from the northeast, and the town was completely at its mercy till it calmed down about 4 o'clock, and gave a chance to the citizens to save the entire city from ruin. As many as seventeen or eighteen blocks are in ashes. The Vogt block, opera house, Methodist, Baptist and Congregational churches, the large implement warehouses and stores of Gibbons, McAllister & Co., Fillion Brothers and E. P. Fitzgerald and the handsome, brick block of P. C. Nickelson, besides five or six hundred residences, have all succumbed to the devouring flames.

Not much less than a million dollars worth of property has gone up in the flames. Fortunately the Unatilla and Cosmopolitan Houses were saved, and these two hotels furnished shelter last night for hundreds whom the fire had rendered homeless. Others found lodgings in the houses of their more fortunate neighbors, and still others spent the night on the bank of the river keeping watch over what little they had rescued from the flames.

It is impossible at this time to make any correct estimate of the amount of insurance covering the property destroyed. Many were well off yesterday morning and to-day are ruined or badly crippled, while many poor people who had no insurance lost all their possessions.

The only serious accident so far as has been learned happened to Joseph Fitzgerald, son of E. P. Fitzgerald, who was seriously burned about the arms, hands, face and breast while making his escape through the flames in his father's residence. As he did not inhale any of the fumes he may recover.

Early yesterday evening the Mayor placed the city under martial law, in charge of the Sheriff and the City Marshal. About thirty citizens and members of the Oregon National Guard are under arms. They paraded the town all night for the purpose of protecting property saved from the flames and scattered almost everywhere, but which it was found impossible to transfer to a place of safety. A number of suspicious characters were thrown into jail for the night and were released this morning and ordered to leave the city.

This morning the Mayor revoked his order placing the city under martial law, and appointed a relief committee to receive subscriptions for the needy.

In response to a call, Mayor May's relief committee met this afternoon in the Court-house and appointed a number of leading citizens to solicit aid for those who are in need. It is found that there are a number of families entirely destitute and immediate aid must be had. Secretary M. A. Moody has already received several contributions.

#### A Frightful Murder.

Special to the Journal.

SEATTLE, September 3.—The mutilated and badly decomposed remains of J. Edlund, a German wood chopper, were found in a corner of the new county cemetery, three miles south of the city, this morning. There was every evidence that the man had been murdered, and circumstances point to John Lucas as the murderer, the man's companion, as the guilty person. The men were engaged as wood choppers by J. Porter, a lumber man. A week ago Lucas woke up Porter at 6 o'clock in the morning and asked for what money was due himself and his companion. He said they were going away. He was paid \$300. This morning in the cabin the two men had occupied an axe with blood stains on the blade and handle was found. A search revealed the body of Edlund with his head crushed about fifty yards from the cabin. Lucas is now in Ravalli, Montana, and the Sheriff has telegraphed to have him arrested.

#### Egan Recalled

Special to the Journal.

CHICAGO, September 3.—A Washington special says: "It is given out that United States Minister Egan has been wired to report in Washington for a personal statement of the condition of affairs in Chili. That Egan has been ordered to Washington is regarded in two lights; one that the administration is dissatisfied with his silence during the last three or four weeks, and the other that he is to be given a leave of absence, anticipatory of arbitrary action on the part of the new administration in Chili, which threatens to give Minister Egan a passport on account of his sympathy for Balmeada's party."

#### World's Fair.

Special to the Journal.

CHICAGO, September 3.—The local directory to-day formally confirmed the nomination of J. M. Samuels of Kentucky as Chief of the Horticultural Department of the World's Fair. He has already been confirmed by the National Board of Control, and is now duly appointed.

#### Died on the Desert.

Special to the Journal.

SAN DIEGO, September 3.—The steamer Manuel Dublan from Ensensena, Lower California, this morning brought the first news of the terrible death of a young Mexican from thirst, and the narrow escape from the same fate of a Chinaman several days ago upon the San Felipe desert, which lies along the gulf coast of the peninsula. Benito Cesena and the Chinaman who did the cooking for the prospecting party became separated from the rest and wandered onto the desert. Being totally unacquainted with the country, and unable to find water the boy and Chinaman suffered fearful tortures before they succeeded in reaching the shores of the gulf. They saw a schooner at anchor about ten miles from shore, but it was useless to attempt to attract the attention of the men on the vessel at that distance and the Chinaman constructed a raft from driftwood and struck out for the schooner, leaving the boy on the shore. Darkness overtook the raft, and the Chinaman being exhausted, fell asleep. When morning came the sailors rescued him and took him ashore. Cesena was found dead near where the Chinaman had left him, and his distorted features and cracked and swollen lips told of his terrible sufferings. The boy was buried on the desert.

#### Another Daring Robbery Attempted.

Special to the Journal.

SAN FRANCISCO, September 3.—The overland express which left here to-day at 3 p. m. was held up by two masked men four and a half miles south of Modesto, at 8:45 o'clock this evening. The engineer, in his report to Superintendent Fillmore, says that at Ceres two masked men crawled over the tender into the engine, and, covering himself and fireman with guns, ordered him to pull out as fast as possible. The engineer obeyed, and after going a short distance halted the train at the command of the robbers. The engineer and fireman were then made to take coal picks and go back to the express car, which they were ordered to break open. The express messenger and detective Len Harris, who was on the train, resisted. After firing a number of shots and exploding a bomb under the car without avail, the robbers ordered the engineer and fireman to walk up the road. The bandits then disappeared in the darkness. The engineer thinks they had horses waiting for them. Detective Harris was badly wounded by a shot from the robbers, and, after an hour's delay, the train hastened to Merced for a doctor. Sheriff Cunningham and a posse from Merced left on a special train for the scene of the attempted robbery and are now in pursuit.

#### Balmaceda on the Wing.

Special to the Journal.

CITY OF MEXICO, September 3.—An Anglo-American, says a prominent gentleman of this city, well known in the Anglo-American colony, received the following dispatch in cipher:

VALPARAISO, September 1.—President Balmaceda is aboard the Condell and expects to disembark in San Francisco. However, if he be pushed by an insurgent war ship, he may land in Mexico. If he does, extend all possible courtesies. This is the first definite news regarding the whereabouts of Balmaceda. The Imperial torpedo boat and Condell sailed north and are said to be pursued by the cruisers of the Congressional Army. Whatever port the President will make he will be protected. No warship will attempt his capture within a marine league of Mexico or the United States. If Balmaceda lands in Mexico, he will receive the hospitality that its constitution grants to all political refugees.

#### Killed by an Elevator.

Special to the Journal.

SEATTLE, September 3.—George L. Hancock was crushed to death in attempting to jump on an elevator in the Pioneer building this evening. He was employed as janitor in the building and had volunteered to run the elevator while the boy went to supper. Hancock got off at the fifth story to light the lamps, when the machine started up, and he being unfamiliar with its operation darted back to shut it down. He was caught by the floor of the elevator and dragged up two stories. The upper half of his head was torn off. He was 28 years old and unmarried.

#### Invited by Balmaceda.

Special to the Journal.

LONDON, September 3.—A letter from an officer on an English war ship at Valparaiso asserts that Balmaceda invited and quarreled with American Minister Patrick Egan and the French Minister. The latter refused to accept an apology, but Minister Egan renewed relations with the government under threats from Senator Dodo that if Mr. Egan gave Balmaceda trouble they would send him aboard an English war ship.

#### Thunder and Lightning.

The people of Austin were treated to an electrical storm last Thursday, of which the Advocate says: The rumbling of the thunder and the brilliant flashes of the lightning were terrible, and it was pitiful to hear the shrieks of women and children and to see strong men grow pale with fright, but could they be blamed when they thought that the next flash might wipe from the earth all that they held so dear, home, wife and children. Do not laugh strangers when you read this, for if you had been here you would have felt the same as some of our people did and run for your collar to hide (if you had one) to be protected from the wrath of nature.

Such a severe storm was never known in this country before, and the wish of the community is that they may never witness another.

#### Daring Train Robbery.

A daring train robbery was committed on the Southern Pacific, at Samuel, Texas, by six masked men shortly after midnight Tuesday last.

Dynamite and Winchester were used as a means of intimidating the express messenger and gaining entrance into the car. All the money and valuables in the express car were secured by the robbers, as well as several sacks of mail and registered packages.

The amount of money obtained cannot be learned, but it will doubtless reach into the tens of thousands.

The train was just pulling out from the station when six masked men, who had selected their positions, simultaneously mounted the engine, mail and express car. Over forty shots were fired, literally perforating the baggage and express car, without injury to anyone, when a dynamite cartridge was exploded against a small window in the express car. The effect of this was to tear the window out and otherwise damage the car.

The express messenger was stunned, but he recovered in a few minutes, only to be overpowered by the robbers and made to give up the safe keys.

The train was delayed several hours. The robbers took their time in doing the job and with the utmost coolness and exhibition of great nerve.

Horses were in readiness for them, and on the completion of their work the bandits rode rapidly away, and are now in Mexico, beyond the reach of the authorities.

#### Deafness Can't Be Cured

By local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When the tube gets inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any of Deafness (caused by catarrh) that we cannot cure by taking Hall's Catarrh Cure. Send for circulars, free.

E. J. CHESKY, Toledo, Ohio.  
Sold by all druggists.

#### The University.

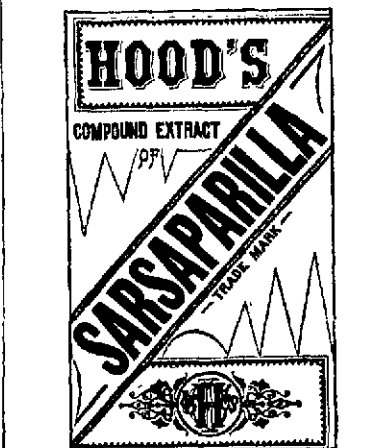

Examinations for admission into the University were commenced yesterday and will be continued to day. There has been more applications this year than in any year since the University started. About fifty new students have thus far presented themselves, and quite a number more are expected. As the University grows older and sends out its quota of graduates every year, it is its own advertisement. It will not be many years until the influence of the school will be a powerful factor in reforming affairs in this State. If Nevada will educate her boys and girls it will not be long until she can put a protective tariff on all her positions of trust and profit, and fill them from her own productions.

#### The Harvest is Ready—Who Will be the Reapers?

From \$3 to \$10 a day awaits the energetic persons who will engage now. No experience necessary to insure your success in representing our new and most complete work on etiquette, entitled, "Polite Society at Home and Abroad." Hundreds are waiting for it and the harvest will be great. This book contains 448 royal quarto pages, comprehending nearly 700 topics. It is beautifully bound in cloth, illuminated covers, gold, silver and black stamping, and sells for only \$2. No capital required. Most liberal terms made known on application.  
Address L. P. Miller & Co., 271 Main St., Stockton, Cal.

#### BORN.

HENLEY—In Hawthorne, Nev., August 31, 1891, to the wife of W. J. Henley, a son.

The importance of purifying the blood cannot be overestimated, for without pure blood you cannot enjoy good health. At this season nearly every one needs a good medicine to purify, vitalize, and enrich the blood, and we ask you to try Hood's Sarsaparilla. It strengthens and builds up the system, creates an appetite, and tones the digestion, while it eradicates disease. The peculiar combination, proportion, and preparation of the vegetable remedies used give to Hood's Sarsaparilla peculiar curative powers. No other medicine has such a record of wonderful cures. If you have made up your mind to buy Hood's Sarsaparilla do not be induced to take any other instead. It is a Peculiar Medicine, and is worthy your confidence. Hood's Sarsaparilla is sold by all druggists. Prepared by C. I. Hood & Co., Lowell, Mass.  
**100 Doses One Dollar**

PRICE OF DAILY JOURNAL,  
FIFTEEN CENTS PER WEEK

Delivered by Carrier,  
FRIDAY.....SEPTEMBER 4, 1901

BREVITIES

Bar Silver 93 3/4.  
Dr. T. Wah Hing has returned from Virginia.

J. L. Wines returned from Winnemucca last night.

R. L. Fulton returned from California yesterday morning.

W. B. Toby of Carson was a passenger for the Bay last night.

Prof. Millman, of the University, has returned from California.

There are a good many drummers in town as well as bummers.

Amity Lodge, No. 8, K. of P., will hold its regular convention this evening.

A. H. Christie of Milwaukee arrived in town last night and is at the Clarendon.

Miss Ella and Stella Edo returned home from San Francisco yesterday morning.

John R. Bradley left Reno yesterday morning for his ranch at Death, Elko county.

Jako Allenback returned yesterday from a two weeks' trip in the neighborhood of Bodio.

Frank Rockwell, of Wells, Fargo & Co., returned yesterday from a pleasant trip to the lakes.

Colonel H. B. Maxson went to Verdi yesterday on a surveying trip and returned last night.

A. F. Haydon left for San Francisco last night to accept a position in the Syrup of Figs Company.

Tom Julian was a passenger on yesterday afternoon's train for Bronco to attend to some legal business.

Miss Lucy Barney returned yesterday from an extended visit to California. She will attend the University.

Hon. E. T. George came in from Lewis yesterday to attend a meeting of the State Board of Regents to be held Saturday.

S. L. Whitaker, United States District Attorney, who has been at Elko attending court, returned to Virginia yesterday morning.

It is reported by telegraph that Balmain, the ex-dictator, has been killed in the mountains while trying to effect his escape.

Fires are the order of the day. It behooves our citizens at this dry season of the year to take extra precautions against the fiend.

B. F. Corlier, Jr., went to Verdi yesterday afternoon on legal business. He will also attempt to catch a fish or two before returning.

Frank Coffin went to San Francisco last night to have an operation performed on his ankle, which he had injured several months ago.

Dr. Mullen leaves for Truckee this morning by private conveyance. He will remain about a week at that place on professional business.

Stephen Connor will sell lots in his addition, east of Reno, on very reasonable terms. This is an opportunity for those who wish homes. See 50-cent column.

Charles Neilson, of Smoke Creek, arrived in Reno yesterday afternoon with a broken collar bone, caused by being thrown from a horse. Dr. Dawson reduced the fracture.

Last evening, about 9 o'clock, while playing with some children, Miss Lizzie Shaver, a niece of W. T. McLaughlin, fell and broke her arm near the shoulder. It was a very painful fracture and required the skill of both Drs. Dawson and Lewis to reduce the fracture.

The Cause of the Winnemucca Fire.

The Silver State says: People had cause to wonder yesterday why the force of water was so good, while the day of the fire the force was only sufficient to throw it a few inches from the end of the nozzle of the fire company's hose. It has developed that the Water (?) Company some time ago concluded arrangements with the railroad company to furnish their tank with four inches of water. This amount of water was running into the company's tank while citizens, who were paying an exorbitant monthly rate for barely enough water to drink, had to stand helpless and see their homes and places of business consumed. Had that four inches of water been in the mains as it should the fire would have been confined to the buildings between N. Levy & Co.'s store and the bank, and the buildings from Mrs. Miller's residence to the Railroad market would not to-day be a mass of ruins.

Alaska's Population.

The population of Alaska as reported by Census Enumerator Ivan Petroff, who has lately returned from there, is in round numbers 31,000. This is the first regular census ever taken of the Territory, though an approximation was made in 1890 of 33,000. The decrease, he says, is due to the natives dying off from the result of their contact with modern civilization, or rather from their contact with the vices of the civilized white man. The population consists of about 18,000 Esquimaux, 5,000 whites, 2,300 Chinese, and the remainder consists of various tribes of natives.

Garden Party.

The W. C. T. U. will hold a garden party next Tuesday, September 8th, at the residence of John Douglas, opposite the Congregational Church, to begin at 4 o'clock in the afternoon. Refreshments will be served, consisting of baked beans, brown bread, doughnuts, cheese, pumpkin pie, ice cream, etc. Also, there will be good music and speaking. Every loyal Nevada should patronize the entertainment, the object of which is to raise funds to send the W. C. T. U. State President to represent this State at the National W. C. T. U.

Tennis Convention.

Next Saturday a convention consisting of delegates from all the tennis clubs in the State will assemble at Carson to decide on a time and place for a State contest. It will probably be held in Reno at the State University tennis court, which has lately been fitted up, and is superior to any in the State. The University Club will send a representative to the contest, and Dr. Phillips has offered a prize of a Pacific Coast Special racket to the champion of the University Club, University contest, to come off a week previous to the State contest.

Employment.

Will be given to applicants for land who wish to pay for water rights with labor. For common labor, \$1 50 per day will be allowed, and for skilled labor, carpenters, blacksmiths, etc., good wages, according to the work done; \$1 per day and feed will be allowed for a team. Employment will be practically steady for a year or more. For full particulars, address Fred W. Lake, Secretary, 6 Flood Building, San Francisco, California.
